

Cruzer USB flash drives with U3 smart technology come in a range of sizes, all featuring a sleek, capless design with a retractable USB plug.

Cruzer Micro and Cruzer Titanium USB Flash Drives with U3

Available in 512MB, 1.0GB, 2.0GB, and a huge 4.0GB, the compact, affordable Cruzer Micro matches up with all your everyday storage and transport needs—for documents, photos, presentations, music, even video clips. The tough, high-performance Cruzer Titanium, available in 1.0GB and 2.0GB configurations, delivers blazing speeds of up to 15MB/sec read and 9MB/sec write^{††}—in an extremely rugged Liquidmetal[®] case.

Minimum System Requirements^{††}

- Intel[®] Pentium[®] or equivalent PC or Macintosh[®] with USB port
- Windows[®] 2000 (SP4 and later), XP OS, and Windows Server 2003
- Macintosh OS 9.1.x+, OS X v10.1.2 or higher
U3 functionality is not supported under Mac OS (any version), but the Cruzer USB drive is Mass Storage Compliant (MSC).
- USB 2.0 port required for high-speed data transfer
- Requires high-power USB hub port

^{††} Based on SanDisk internal testing.

SanDisk[®] Cruzer[®] USB Flash Drives with U3[™]

Your Digital Universe on a USB Drive

SanDisk[®]
STORE YOUR WORLD IN OURS[®]

Not just your *files*, but your *software* too ...
Everything you need for work or play ...
Just you and U3 on any PC.*

More Portable, More Personal

Now you can use your Cruzer USB flash drive to carry your entire digital universe. . . . Not just your photos, but a photo viewer for sharing them, too. Not only your music, but your favorite music player, too. Not just your files, but your personal favorites and preferences, your emails and calendar, your software programs, including your games. Everything that makes your computer, *your* computer.

U3: The Complete Mobile Computing Platform

You've always been able to carry your files on a USB drive. But what if you plug into a computer that does not have the software to access those files? It's like having your papers locked in your briefcase—and no key.

Now all SanDisk Cruzer Micro and Cruzer Titanium USB flash drives offer a smart solution. U3 technology, co-invented by SanDisk, gives you a *complete* mobile computing platform on a USB device. All you need is a PC to plug into and you're off and running.

* U3 functionality only supported on Windows 2000 (SP4 and later), XP OS, and Windows Server 2003

Your Digital Universe—To Go! SanDisk Cruiser USB Flash Drives with U3

Along with your files, you'll always have the U3 smart programs you need to access them. And the U3 Launchpad** gives you everything you need to manage your programs, from installing to launching to updating.

**Not all software titles shown are included with this product.

*** No security product is 100% secure.

† 1 megabyte = 1 million bytes; 1 gigabyte = 1 billion bytes. Some of the listed capacity is used for formatting and other functions, and thus is not available for data storage.

The U3 platform supports hardware encryption and password protection. Once protected, your Cruiser flash drive is inaccessible to anyone until the correct password is entered. And it leaves no personal data on any host computer after you remove the drive. So there's no compromising the PC's system stability—or your personal privacy and security.***

Mobile and Private

- Carry your favorite programs and preferences along with your documents and files.
- Plug into any PC,* anywhere, and it's just like your own.
- Leave no trace of your work on any PC.*

Software Included . . . and Ready for More

Every Cruiser USB flash drive with U3 technology comes preloaded with useful everyday applications, including virus protection, password management, the SanDisk CruzerSync™ synchronization utility, and Skype™, which allows you to make voice and video calls from PC to PC.

And U3 is an open platform, so software companies can easily modify their PC software to be U3 compatible. Already thousands of vendors are adding to the growing list of U3 programs available, including many of your favorite applications: browsers and email, business and utilities, multimedia and games and more.

SanDisk makes it easy to keep up with the latest and the best, with an updated selection of recommended U3 programs at SanDisk U3 Download Central (u3.sandisk.com). Or you can browse the complete current offering of U3 software at www.u3.com.

Whatever U3 software you choose, most software downloads with one click directly onto your U3 smart drive. With up to 4GB† available capacities, Cruiser flash drives have plenty of room for both your files and your U3 smart programs.

Drag-and-Drop Convenience—Plus CruzerSync

Of course, every SanDisk Cruiser flash drive still functions as a standard USB drive, the most compact, convenient way to transport documents, photos and other files.

You can still simply drag and drop items from My Computer or Windows Explorer to your Cruiser flash drive. And you can use the SanDisk exclusive CruzerSync to “sync up” your Outlook® and other PC files with the Cruiser drive, quickly and easily.

Computing That's Personal

Now featuring U3 smart technology, SanDisk Cruiser flash drives signal the start of a paradigm shift. It's not about the personal computer any more. Now it's personal *computing*: You and U3 on any PC.
